

PMU EYELINER /EYELASH ENHANCEMENT/ AFTER CARE

Your skin will be temporarily sensitized after the treatment and you should adhere to the following instructions for the next 10 days.

This will help avoid infection and allow time for the skin to recover.

If you apply makeup during the next 5 days following your treatment, you do so entirely at your own risk. Healing can take up to 10 days and it is perfectly normal for small scabbing to appear on the treated area. These should be allowed to fall off naturally over a period of a few days. After the treatment; It is also normal for there to be fading of the color during the first 2 weeks and patchy sections, as the skin is still healing and the pigment will return to the surface in about 30 days. The outcome will be subtle. This IS NOT eyeliner tattoo, it is Eyelash Enhancement. A soft shadowed enhancement to your lash line to create the illusion of fuller lashes. This will not replace the use of eyeliner but instead give you a natural eye enhancement.

Instructions

- For the 10 days following the tattoo procedure, wash the site gently and apply ointment 2 times per day
- With eyes closed wash the site gently with gentle soap and warm water using your hands only. (baby shampoo is ideal)
- Blot the area dry. Do not rub with a towel.
- With eyes closed massage ointment in gently for 10 seconds and then gently blot off the excess goo. Be careful to not get any ointment in the eyes as it will burn.
- After blotting, the area should not be oily or greasy to the touch. Allow the skin to breathe.
- Sleep slightly elevated for the first few nights to reduce swelling.

Wait 6 weeks for full healing prior to deciding if you require a touch up. Colour will fade 30-40%. Most do not require one however if you feel you would benefit from an additional session please feel free to book a touch up appointment.

Cautions

- Do not pick at the tattoo site at any time during healing.
- Be careful not to get ointment in your eyes and use it sparingly.
- Do not let the area dry out completely, since this can cause scabbing and cracking of skin surface.
- Do not Touch the treated area.
- Do not use creams or make up on the treated area(s)
- Avoid facial treatments such as eyelash tinting, perming or lifting.
- Avoid abrasive materials such as rough towels or similar.
- Avoid taking hot baths, saunas or other heat treatments.
- Avoid sunbathing, using Sunbeds or swimming.
- Avoid hot yoga/spin class for 10 days. Moderate exercise is ok.
- Avoid Makeup for 5 days. If you apply makeup you do so at your own risk.

If small scabs appear on the treated area, DO NOT TOUCH THEM. They will fall off in a few days. ***There are no implied or written guarantees if you don't take care of your Permanent Makeup.*** Should infection occur, seek immediate medical attention.
